Education

Andhra University College of Engineering

B.Tech + M.Tech Integrated (Computer Science & Engineering); CGPA: 8.45/10.0

Visakhapatnam, AP

2023 – 2029

Technical Skills

Languages: Java, Python, C, SQL

Web Technologies: HTML5, CSS3, JavaScript, TypeScript, React.js, REST APIs

AI & ML Technologies: Generative AI, LLM Integration, Gemini API, NLP, OpenCV, Prompt Engineering

Databases & Tools: MySQL, Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks

Experience

RoboCoupler Techno Solutions Pvt. Ltd.

Full Stack Developer Intern (AI-Integrated)

Visakhapatnam, AP

May 2025 – July 2025

- Developed RIA, an AI-powered voice assistant with 5+ features including wake-word activation, authentication, chat history, voice interaction, and guidance modules.
- Built responsive frontend modules including animated voice interface, conversation history, accessibility-focused workflows, and interactive user experiences.
- Implemented computer vision workflows supporting intruder detection, age-gender prediction, configurable thresholds, automated captures, and organized detection history.

Projects

CareerPilot – AI Career Assistant | *React, TypeScript, Gemini API, Gmail API, LLM Integration*

- Developed a GenAI-powered career assistant with 5+ modules including Gmail analysis, email classification, application tracking, calendar, and AI agent monitoring.
- Built AI workflows for email summarization, deadline extraction, classification, and action recommendations using Gemini API.
- Integrated Gmail API and interactive dashboards to convert unstructured career emails into organized insights.

RIA Assistant | *Python, Flask, NLP, Speech Recognition, AI APIs*

- Built an AI voice assistant with 5+ features including wake-word activation, speech input, text chat, history tracking, and guidance modules.
- Designed modular workflows for speech recognition, NLP processing, AI response generation, and user interaction management.

FORGE – Execution Intelligence | *Next.js, React, TypeScript, Supabase*

- Developed a full-stack productivity platform with 4+ modules including authentication, task management, workflow tracking, and dashboards.
- Implemented Supabase authentication, database integration, user-specific data handling, and reusable React components.

VisionSentinel – Intruder Detection System | *Python, OpenCV, Streamlit*

- Built a computer vision security system with 4+ features including face detection, intruder identification, age-gender prediction, and monitoring.
- Implemented automated image capture workflows with configurable thresholds, timestamp-based gallery organization, and Streamlit dashboard controls.

Certifications & Achievements

- Full Stack Development Integrated with AI – RoboCoupler Techno Solutions
- Java Full Stack with React JS & AI
- Runner-Up – 48 Hour Front-End Build-a-thon
